NO. 4.

Rochester Commercial Nurseries

ESTABLISHED 1830.

WM. S. LITTLE & CO.'S

SEMI-ANNUAL

PRICE LIST

SPRING, 1897.

TERMS AND CONDITIONS OF SALE.

The prices quoted in this List are expected to apply only where the specified quantities are taken, except as follows strictly : *Where the order amounts to \$10 or over, five hundred will be supplied at thousand rate; fifty at the hundred rate, and six at the dozen rate:* At these wholesale prices, in the case of fruit trees, etc., the *varieties* are to consist of leading popular sorts, such as we cultivate in considerable quantities. See Descriptive Catalogue for list of varieties cultivated.

TRANSPORTATION—In furnishing trees, etc., on the terms of this Price List we cannot be responsible for the accidents or delays of transportation. All articles after leaving the Nursery in good condition, are entirely at the risk of the purchaser. Except in case of accident or gross carelessness, our packages will endure the longest journey in perfect safety.

GUARANTY—We honestly believe every tree which we send out to be genuine and true to label; and we are willing, and hold ourselves ready in every instance where a variety does not prove to be the correct one, to refund the purchase money or replace the trees, free of charge to our customer; but beyond this we do not hold ourselves liable for constructive damages by reason of errors.

OUR OFFICE, Greenhouses and Nurseries are situated at the corner of Culver and Clifford streets, about three miles from the center of the city. We shall be happy to welcome our friends there, and if those intending to visit us will telephone to us before leaving the city we will meet them at the eastern end of the Parsells Avenue electric car line with carriage.

TERMS CASH, except by special agreement. On account of the perishable nature of the goods, we decline to forward any orders C. O. D., unless accompanied by a remittance sufficient to secure us from possible loss.

Correspondence is invited from all those who are interested in purchasing or planting trees, either in *large or small* quantities.

Address,

W. S. LITTLE & CO.,

COMMERCIAL NURSERIES,

ROCHESTER, February, 1897.

ROCHESTER, N. Y.

EVERGREENS—Rooted Cuttings.

Ready May 1st. These are strong cuttings, thoroughly rooted, of some Evergreens always scarce. We have sent them out for several years with great success. Of those we planted ourselves in the open ground, more than 95 per cent grew. We pack them in small compass in such manner as to insure safe carriage in perfect condition.

SPECIALTIES AND NOVELTIES.

For prices of items mentioned below see previous pages. Single specimens of any of the items will be sold at one-tenth of the Dozen Rate.

BEECH—FERN LEAF. One of the most delicately beautiful trees in outline when in a growing state. H. W. Sargent, in his supplement to Downing's Landscape Gardening, says in reference to this tree: "If we could plant but half a dozen trees, this would be certainly one of the first."

BEECH—PURPLE LEAF. We have some very fine specimens of this remarkable tree.

BEECH—WEeping. The most picturesque tree of the temperate zone, so says Scott in his treatise on landscape gardening.

BEECH—Weeping Purple. The name of this tree sufficiently describes it. It is a combination of the singular qualities of the two preceding varieties.

CHINESE MAGNOLIAS. We have a very fine collection of these trees, and we handle them in such a way that they are almost sure to live. They are grown in a stiff soil, which enables them to be lifted with a large ball of earth attached to the roots. We offer the following varieties. They all have blossom buds, and will flower a week or two after they are planted: *Alexandrina*, the most vigorous grower; flowers white with pink markings. *Lenne*, dark red; flowers very large. *Norbertiana*, large pink flowers; one of the best. *Soulangeana*, deep pink; a most beautiful color. *Speciosa*. If we could have but one Magnolia this is the sort we should choose. The tree is a good grower, and naturally makes a compact, round-headed tree. The flowers are borne in the greatest profusion, literally covering the tree; the color is white, tinged with pink at the base of the petals.

NORWAY MAPLES. We have an unusually fine stock of this valuable street tree.

CEDRELA SINENSIS. Any one who wants something nice and wants it quickly should plant one of these trees. A specimen planted in Fairmount Park, Philadelphia, ten years ago, is now about thirty feet high and nearly as many in width. Last spring we planted some little wisps, about the size of knitting-needles, in our nursery, and they are now about four feet high and nearly an inch in diameter. The leaves are put together on the style of the Locust leaf, and are about three feet long. In general style the tree resembles the Ailanthus, but it is entirely free from its disagreeable odor.

JAPANESE CHESTNUT. A fine hardy tree, bearing nuts the size of the French Marron. The meat is sweeter and the tree is harder.

JAPANESE WALNUT. Bears exactly the same relation to the English Walnut that the Japanese Chestnut bears to the French Marron. These two Japanese trees are being planted quite extensively in this country and are very profitable, they both come into bearing when quite young.

JAPAN MAPLES. Beautiful little dwarf trees with exquisite foliage. We have tried a great number of varieties but have now given up all but the three following sorts, *Atropurpureum*, *Atropurpureum Dissectum* and *Sanguineum*.

JAPANESE WEEPING ROSE FLOWERING CHERRY. In our estimation the most beautiful of the weeping trees. In form of head it resembles the Camperdown Elm, but the branches are more slender and graceful. In the spring before the leaves appear it is covered with beautiful rosy pink flowers making a sight which once seen will not be soon forgotten.

ROCKY MOUNTAIN DWARF CHERRY. A very hardy dwarf variety, rarely exceeding four or five feet in height. As an ornamental shrub it is very fine, being covered in spring with masses of white bloom. Its fruit is black, quite sweet and about the size of the English Morello. It begins to fruit when two years old and sixteen quarts of fruit have been picked from a three year old bush. As we have never tasted the fruit we can not vouch for its quality, but we are assured on good authority that it is very fine. It ripens in August after all other Cherries are gone.

EVERGREENS.

COLORADO BLUE SPRUCE. We have some very fine highly colored specimens of this most beautiful tree.

WEeping NORWAY SPRUCE. (*Abies excelsa inverta.*) A most curious and graceful tree. It should be tied up to a stake for a few years in order to allow it to get sufficient height to exhibit its peculiarities. When thus trained the side branches fall directly downward, and with their rich covering of foliage drape the stem as a robe falls around the person.

JAPANESE CYPRESS. (*Retinispora.*) A most beautiful group of evergreens, much hardier than the Lawson Cypress. We offer three varieties. *Retinispora Pisifera.* The type. A fine tree of medium size with foliage resembling the Arbor Vitæ, but much more delicate in general effect, it considerably resembles the Lawson Cypress, but the foliage is of a lighter color. *Retinispora Squarrosa* is not so large a growing tree as the preceding. Its habit of growth is peculiar and may be described as cylindrical. The foliage is needle-shaped and of a soft, silvery blue color. *Retinispora Plumosa Aurea* is the brightest golden evergreen that is hardy in this latitude.

SHRUBS AND VINES.

STANDARD HYDRANGEAS. These are simply plants of *Hydrangea Paniculata Grandiflora* trained to a single stem some four feet high. When in bloom they are very showy.

AZALEA MOLLIS. One of the most beautiful hardy shrubs in the world. When in bloom there is nothing to be seen but a cloud of color, and such soft, beautiful colors, too, Yellow, Salmon Pink and Creamy White in an infinite variety of shades. Besides our ordinary stock of dwarf bushes we can offer this year some fine standards with stems running from eighteen inches to three feet in height. A bed of these flowers is worth going a hundred miles to see.

CLEMATIS. We have in stock more than twenty-five varieties of this beautiful climber, and have room here to mention but two of them. Mme. Edouard Andre is a new sort, first exhibited in this country at the Chicago Exposition. It is larger than Jackmanni, nearly as free a bloomer, and the flowers are red. **CLEMATIS PANICULATA** is a small flowering variety, blooming about the first of September. It is as fragrant as a Jasmine, a tremendous grower and a most free bloomer. In our opinion this vine ranks in value with the Boston Ivy, (*Ampelopsis Veitchii.*)

PEONIES. Besides a fine collection of Herbaceous Peonies we can offer this year some very fine Tree Peonies, including that most valuable and rare sort, Reine Elizabeth. It has flowers of the largest size and of a rich red color.

ROSES. We have our usual fine assortment of Roses, and would call attention here to only two or three sorts. We have some very fine field-grown plants of *La France* and *Duchess of Albany*. They are on their own roots, and last summer made a growth of over three feet.

ROSA RUGOSA (For Hedges). The plants that we offer for this purpose are 1-year seedlings, about four inches high. They are in good condition, and with a little care should all grow. *Rosa Rugosa* is pre-eminently fitted for a hedge rose. It is a strong, vigorous grower, and its foliage is not affected by bugs and the diseases which are so apt to attack ordinary varieties of roses. The flowers are single, run from two to four inches in diameter, and are of various shades of red, pink and white.
